

TMFT 36

SKF bearing fitting tool kit TMFT 36

SKF bearing fitting tool kit TMFT 36 helps prevent premature bearing failures.

Application: Poor fitting, usually using brute force, accounts for 16% of premature bearing failures. SKF Bearing Fitting Tool Kits are designed for quick and precise mounting of bearings, while minimising the risk of bearing damage. The right combination of impact ring and sleeve allows effective transmission of mounting force to the bearing ring with the interference fit, minimising the risk of damaging the bearing's raceways or rolling elements. In addition to mounting bearings, the TMFT series are also suitable for mounting other components such as bushings, seals and pulleys.

Advantages: The TMFT 36 facilitates the mounting of different bearings with bore diameters from 10–55 mm, the impact rings are suitable for use under a press, impact rings are marked for clear visual identification of the ring's size and easy selection.

Producer: SKF (Sweden)

Technical information:

Designation	TMFT 36
Impact ring	Bore diameter: 10-55 mm Outer diameter: 26-120 mm
Sleeves. Maximum shaft length	Sleeve A: 220 mm. Sleeve B: 220 mm Sleeve C: 225 mm
Hammer	TMFT 36-H, weight 0,9 kg
Carrying case dimensions	530 x 110 x 360 mm
Number of rings	36
Number of sleeves	3
Weight (including carrying case)	4,4 kg

HIDROBALT

Quality and reliability since 1995..
